

Ecoset Mini Sensor

The Pierlite Ecoset Mini IP65 Occupancy Sensor is a compact and efficient lighting control solution for recessed indoor and outdoor spaces. Featuring advanced PIR and photocell technologies, it ensures lights are activated only when necessary, enhancing energy savings and reliability. With a sleek design, large terminals, and adjustable settings, it is ideal for applications such as offices, restrooms, and outdoor foyers.

- Fits a 63-66mm cutout size and integrates seamlessly into various recessed installations, both indoors and outdoors.
- Utilizes passive infra-red (PIR) technology to detect heat and movement, minimizing false triggers and automatically switching off lights when areas are vacant.
- Offers a 360-degree detection range with customizable time delays (10 seconds to 15 minutes) and lux levels (3lx to 2000lx) to suit different environments.
