ECO PANEL GEN2

PRODUCT DETAILS

Size: 600x600mm, 1200x300mm, 1200x600mm
Rated life: L70 B50 50000hrs
LED: Colour Select 4000K/5000K/6500K, CRI80, 6SDCM
Beam angle: Symmetrical, 110°
Driver: Remote, Non dimmable
Rating: IP40 from below/IP20 from above, Class II
Operating temperature: 0°C to +40°C
Housing: Aluminium trim, Steel back plate
Finishing: White RAL9016, Powder coated
Diffuser/Lens: Polystyrene (PS), Frosted,
Connection: 1.2m Flex & Plug
Accessory: Complete with restraint bracket kit
Warranty*: 5 year

MADE TO ORDER OPTIONS (LEAD TIME AND MOQ MAY APPLY)

Dimming, Emergency, Surface mounted frame, Recessed frame

APPLICATIONS

Recessed (grid ceiling), Internal
Offices, Schools, Foyers, Waiting-rooms, Shopping centres,
Commercial, Retail

BLADE EXIT LIGHT GEN2

PRODUCT DETAILS
Viewing distance: 24m
Rated life: L70 B50 50000hrs
Driver: Integral, Non dimmable
Emergency: Maintained, Manual test, Replaceable lithium iron phosphate (LiFeP04) battery, 18 months shelf life
Rating: IP20, Class II
Operating temperature: 0°C to +40°C
Housing: Polycarbonate (PC), Swivel panel
Finishing: White/Black
Accessory: Complete with all pictograms; Optional Recess kit, IP65 enclosure
Compliant: AS/NZS 2293
Warranty*: 5 year on fixture and lamp, 4 years on battery

MADE TO ORDER OPTIONS (LEAD TIME AND MOQ MAY APPLY)
DALI emergency

APPLICATIONS
Surface mounted (ceiling/wall), Internal
Commercial, Schools, Retail, Hospitality, Apartments, Theatres and Cinemas

WEATHERLUX CEILING EXIT LIGHT GEN2

PRODUCT DETAILS
Viewing distance: 24m
Rated life: L70 B50 54000hrs
Driver: Integral, Non dimmable
Emergency: Maintained, DALI emergency, Manual test, Replaceable lithium iron phosphate (LiFeP04) battery, 18 months shelf life
Rating: IP65, IK08, Class II
Operating temperature: 0°C to +40°C
Housing: Polycarbonate (PC)
Finishing: White
Accessory: Complete with all pictograms
Compliant: AS/NZS 2293
Warranty*: 5 year on fixture and lamp, 4 years on battery

APPLICATIONS
Surface mounted (ceiling), Internal/External
Damp environments, Warehouses, Production facilities, Car parks, Schools, Coastal areas

WEATHERLUX WALL EXIT LIGHT GEN2

PRODUCT DETAILS
Viewing distance: 16m
Rated life: L70 B50 54000hrs
Driver: Integral, Non dimmable
Emergency: Maintained, DALI emergency, Manual test, Replaceable lithium iron phosphate (LiFeP04) battery, 18 months shelf life
Rating: IP65, IK08, Class II
Operating temperature: 0°C to +40°C
Housing: Polycarbonate (PC)
Finishing: White
Accessory: Complete with all pictograms
Compliant: AS/NZS 2293
Warranty*: 5 year on fixture and lamp, 4 years on battery

APPLICATIONS
Surface mounted (wall), Internal/External
Damp environments, Warehouses, Production facilities, Car parks, Schools, Coastal areas

EMERGENCY CONVERSION KIT

PRODUCT DETAILS
Seamless conversion of Pierlite panels and troffers to emergency luminaires
Integrated emergency solution rather than conventional spitfire emergency solution to save installation time and cost
Plug-and-Play system allows easy onsite installation
Unique Sticker-Based testing configuration avoiding drilling holes in luminaires
Maintained, Manual test, Lithium iron phosphate (LiFePO4) battery, 12 months shelf life, 2hrs battery discharge time
All Luminaires individually compliant to AS/NZS 2293
Rating: IP20
Operating temperature: 0°C to +50°C
Warranty*: 3 year

APPLICATIONS
Recessed
Use with Pierlite panels and troffers only

LUMEN SELECT™ COLOUR SELECT™

ECO EMERGENCY BATTEN GEN3

PRODUCT DETAILS
Size: 2ft/600mm, 4ft/1200mm, 5ft/1500mm
Rated life: L70 B50 54000hrs
LED: Colour Select 4000K/5000K/6500K, CRI80, 5SDCM
Beam angle: Symmetrical, 120°
Driver: Integral, Lumen Select, Non dimmable, Flicker free design
Emergency: Maintained, Manual test, Replaceable lithium iron phosphate (LiFeP04) battery, 18 months shelf life
Rating: IP20, IK06, Class I
Operating temperature: 0°C to +40°C
Housing: Steel
Finishing: White RAL9003, Powder coated
Diffuser/Lens: Polycarbonate (PC), Frosted, Insect proof
Connection: Removable LED module with quick release clips and connector, Ø20mm knockout for conduit or cable glands, Center cable entry, End to end mounting
Warranty*: 5 year on fixture and lamp, 4 years on battery

MADE TO ORDER OPTIONS (LEAD TIME AND MOQ MAY APPLY)
Dimming, Non maintained emergency

APPLICATIONS
Surface mounted (ceiling/wall), Internal
Commercial, Retail, Residential

**NOW AVAILABLE
WITH ICONIC KIT!**

LEDSMART PHASE DIMMER

PRODUCT DETAILS

Compatible with PDL Iconic, PDL 600, PDL Saturn Zen, Legrand Excel, Clipsal 2000 and HPM Excel XLP770 switch plates
Phase dimming control for LED lamps and light fixtures
Excellent compatibility with other lamps such as incandescent lamps, 12V halogen (dichroic) lamps/ transformers and CFL's
2W - 400W load
Configurable minimum brightness with mechanical adjustment
Minimum brightness typically 0%
Separately switched 2-wire design, no neutral wire connection required for wallplate retrofit installation
Integrated LED indicator illuminates the dimmer knob
Incorporates a thermal fuse to protect itself against overheating
Incorporates filtering to reduce load brightness variation under conditions of line voltage ripple signal injection
"Soft-start" to help prolong the lamp and driver life
Inherent immunity to installation wiring short circuit fault
Warranty*: 2 year

APPLICATIONS

Surface mounted (wall), Internal
Commercial, Public areas, Hotels, Garages, Schools, Health care

CODE	DESCRIPTION	POWER	LUMENS	EFFICACY	WEIGHT
MEDM-KIT	ROTARY PHASE DIMMER	N/A	N/A	N/A	N/A

*Please refer to the warranty policy at www.pierlite.co.nz; "POWER" is tested system powers from luminaire; "LUMENS" is delivered lumens from luminaire, including thermal, electrical and optic losses; ^Figures are interpolated / extrapolated from data at other versions.

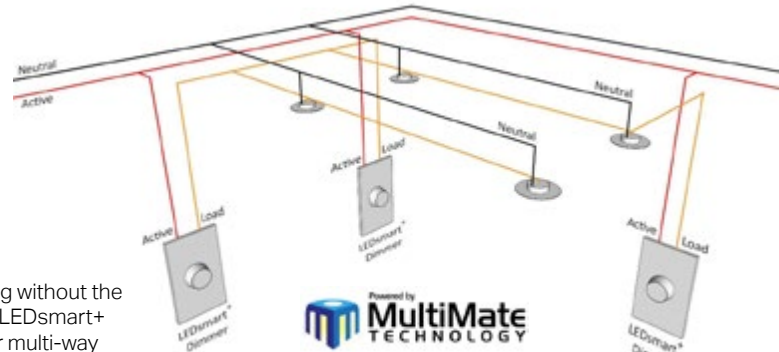

LEDSMART PLUS PHASE DIMMER & SWITCH

PRODUCT DETAILS

Compatible with PDL 600, PDL Saturn Zen, Legrand Excel, Clipsal 2000 and HPM Excel XLP770 switch plates
Integrated tap on/off switch
Phase dimming and switching control for LED lamps and light fixtures
Excellent compatibility with other lamps such as incandescent lamps, 12V halogen (dichroic) lamps/ transformers and CFL's
1W - 400W load
Fully programmable functions such as minimum brightness, maximum brightness, kickstart, LED indicator
Minimum brightness typically 0%
Quick-flick to dim to minimum or maximum
Double tap to dim to minimum or maximum over 30 minutes
Separately switched 2-wire design, no neutral wire connection required for wallplate retrofit installation
Integrated LED indicator illuminates the dimmer knob
Incorporates a thermal fuse to protect itself against overheating
Incorporates filtering to reduce load brightness variation under conditions of line voltage ripple signal injection
"Soft-start" to help prolong the lamp and driver life
Inherent immunity to installation wiring short circuit fault
Warranty*: 2 year

APPLICATIONS

Surface mounted (wall), Internal
Commercial, Public areas, Hotels, Garages, Schools, Health care

MultiMate™ technology allows multi-way control of lighting without the need for an expensive control system. It enables multiple LEDsmart+ devices to be wired in parallel when two-way, three-way or multi-way control is required. When connected in parallel LEDsmart+ dimmers allow dimming and switching of connected lighting loads from multiple locations without any additional wiring. No strapper wires, dedicated remote switch wiring or 'control bus' is required.

The wiring example on the left shows three LEDsmart+ dimmers connected in parallel to provide three-way dimming and switching of four downlights without any additional wiring.

CODE	DESCRIPTION	POWER	LUMENS	EFFICACY	WEIGHT
MDM/RT-KIT	ROTARY PHASE DIMMER & SWITCH	N/A	N/A	N/A	N/A

*Please refer to the warranty policy at www.pierlite.co.nz; "POWER" is tested system powers from luminaire; "LUMENS" is delivered lumens from luminaire, including thermal, electrical and optic losses; ^Figures are interpolated / extrapolated from data at other versions.

DALI WALL PLATE DIMMER & SWITCH

PRODUCT DETAILS

Integrated tap on/off switch
DALI dimming and switching control for DALI light fixtures
Configurable minimum brightness setting
Colour temperature control (requires DGDALIDM8 model and DALI Type 8 LED drivers)
Up to four DALI Wall Plate Dimmers can be connected in parallel on a DALI Line for multi-point control
Built in 125mA DALI power supply (mains connection required)
Able to control up to 50 DALI drivers on a single DALI line
Only mains connection (active and neutral) and DALI connection (DA/DA) required
Can be powered by external DALI power supply connected to DALI line (no mains connection required)
No external DALI power supply or other equipment is required
No programming of the device or DALI drivers is required
Warranty*: 2 year

APPLICATIONS

Surface mounted (wall), Internal
Commercial offices, Meeting rooms, Board rooms, Executive offices, School classrooms, Hospital wards

TYPICAL CONNECTIONS

Up to four Diginet DALI Wall Plate Dimmers can be connected to the same DALI line. Connections can either be to (a) both Mains and DALI, or (b) DALI connections only.

CODE	DESCRIPTION	POWER	LUMENS	EFFICACY	WEIGHT
DGDALIDM	ROTARY DALI DIMMER & SWITCH WALL PLATE	N/A	N/A	N/A	N/A

HIGHBAY SENSOR

PRODUCT DETAILS

Plug-and-Play installation via pre-fitted piggyback plug and socket
ON/OFF control up to 800W
HF sensor technology for reliable movement detection
Maximum detection range 360° 10M(Ø)x12M(H)
Adjustable detection range (100%/75%/50%/10%)
Intelligent photocell with daylight prior to motion detection
Adjustable hold-time after last movement (2 sec to 30 min)
Fast programming via integral rotary switch with 16 pre-sets
Advanced programming via optional remote control
Suitable for most highbay/lowbay fittings
Rating: IP65, Class I
Operating temperature: -20°C to +50°C
Finishing: Black
Connection: 1.6m Flex & Plug
Accessory: Optional remote control
Warranty*: 5 year

APPLICATIONS

Internal/External
Warehouses, Factories, Storage facilities, Shopping/retail centres

Ingress protection ratings (IP) Defined by IEC 60598

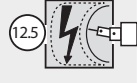

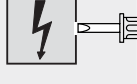

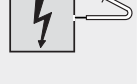

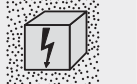

The resistive performance of fittings to solids and liquids is indicated by the IP (Ingress Protection) prefix followed by two numbers.

The first number indicates the measure of protection against the ingress of solids. For instance: **IP2X**

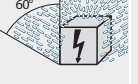

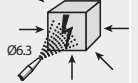

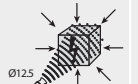

The second number indicates the measure of protection against the ingress of liquids. For instance: **IPX5**

Ingress Protection (IP) Specification Guide

Protection against the ingress of solid objects IP.1X

IP No.	Example	Protection against contact and ingress of objects	Tests	Symbol
IP1X		Protected against solid objects greater than 50mm ø	A large surface of the body, such as a hand (but no protection against deliberate access). Solid objects exceeding 50mm in diameter.	
IP2X		Protected against solid objects greater than 12mm ø	Fingers or similar objects not exceeding 80 mm in length. Solid objects exceeding 12mm in diameter.	
IP3X		Protected against solid objects greater than 2.5mm ø	Tools, wires, etc., of diameter or thickness greater than 2.5mm. Solid objects exceeding 2.5mm in diameter.	
IP4X		Protected against solid objects greater than 1.0mm ø	Wires or strips of thickness greater than 1.0mm. Solid objects exceeding 1.0mm in diameter.	
IP5X		Dust protected	Ingress of dust is not totally prevented but dust does not enter in sufficient quantity to interfere with satisfactory operation of the equipment.	
IP6X		Dust tight	No ingress of dust.	

Protection against the ingress of liquids IPX1

IP No.	Example	Protection against contact and ingress of water	Tests	Symbol
IPX1		Protected against dripping water	Dripping water (vertically falling drops) shall have no harmful effect	
IPX2		Protected against dripping water when tilted up to 15°	Vertically dripping water shall have no harmful effect when the enclosure is tilted at any angle up to 15° from its normal position	
IPX3		Protected against spraying water	Water falling as a spray at an angle up to 60° from the vertical shall have no harmful effect	
IPX4		Protected against splashing water	Water splashed against the enclosure from any direction shall have no harmful effect	
IPX5		Protected against water jets	Water projected by a nozzle against the enclosure from any direction shall have no harmful effect	
IPX6		Protected against heavy seas	Water from heavy seas or water projected in powerful jets shall not enter the enclosure in harmful quantities	
IPX7		Protected against the effects of immersion	Ingress of water in a harmful quantity shall not be possible when the enclosure is immersed in water under defined conditions of pressure and time	
IPX8		Protected against submersion	The equipment is suitable for continuous submersion in water under conditions which shall be specified by the manufacturer. NOTE Normally, this will mean that the equipment is hermetically sealed. However, with certain types of equipment, it can mean that water can enter but only in such a manner that it produces no harmful effects.	

IK ratings Defined by UTE 20010

Degree of Impact Protection EN62262.

IK rating system is an International classification showing degrees of protection provided by luminaires against external mechanical impacts.

Number	Measure of protection – impact energy (joules)	Test
	No protection to this standard -	
	0.15	0.20kg impact
	0.20	0.20kg impact
	0.35	0.20kg impact
	0.50	0.20kg impact
	0.70	0.20kg impact
	1.00	0.50kg impact from 200mm
	2.00	0.50kg impact from 400mm
	5.00	1.70kg impact from 295mm
	10.00	5.00kg impact from 200mm
	20.00	5.00kg impact from 400mm
When higher impact energy protection is required 50 joules is recommended.		

DIMMING OPTIONS

Understanding the different dimming types is critical to the success of any lighting project.

Phase-Cut Dimming (Trailing Edge/Leading Edge)

The most basic form of dimming, originally developed for incandescent loads. This is your typical domestic type dimmer. No additional wiring other than standard 2C+E. The dimmer simply “chops” or “cuts” the voltage signal going to the light fitting. Dimmer is simply added to the Active line.

- No extra wiring is required.
- Standard Trailing Edge/Universal Dimmer can be used.
- Available in out-puts ranging from 350mA – 750mA

Push DIM

Is one of the simplest types of dimming available on the market, and is suitable for use in small to medium sized installations. No low voltage cables or no digital controllers are required - Each downlight requires a standard 2C+E plus a 1 or 2 Core Switch wire, a “normally open” type push button switch is required to operate a Push DIM system. Don’t mix different Push DIM drivers on the same circuit.

- Additional 1-2 Core Switch wire is required.
- Dimming occurs through the use of a “normally open” type push button switch
- Available in out-puts ranging from 350mA – 1400mA

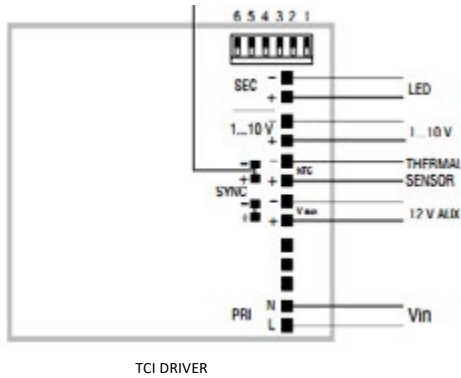

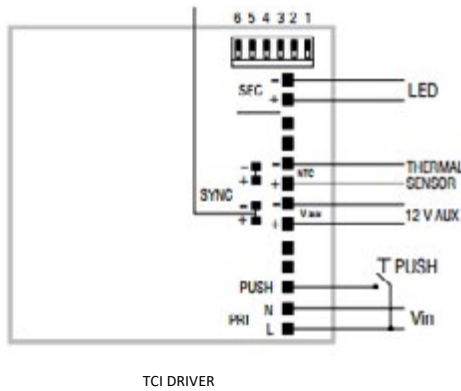

1-10V Dimming

1-10V (Analogue) Dimming uses an analogue signal rather than a digital signal. It is a universal protocol, so all 1-10V drivers operate in the same manner. Each downlight requires a standard 2C+E plus two control lines to carry the low voltage signal (polarity sensitive). You will also require a potentiometer (or some other 1-10V Dimming controller).

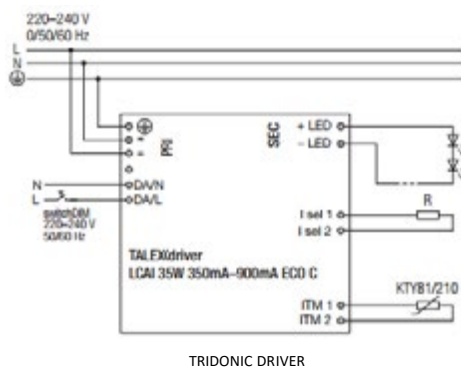

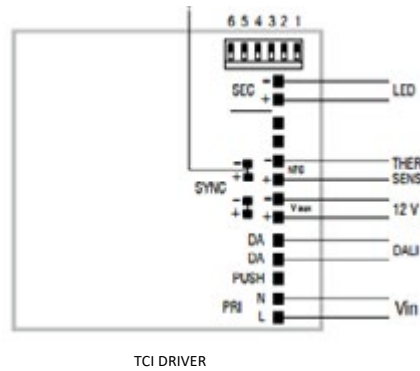

- Additional 2-Core LV control cable is required.
- Dedicated 1-10V interface or potentiometer is required to control this driver
- Available in out-puts ranging from 350mA – 1400mA

DALI

Digital Addressable Lighting Interface – DALI – is a universal protocol (IEC 62386), designed to allow varying manufacturers products to all work on the same system. So it doesn’t matter whose light fitting you are using, if it is DALI it will work on a DALI controlled system. Up to 64 light fittings can be controlled per DALI

line, buildings can have multiple DALI lines. Wiring to a DALI downlight requires a standard 2C+E, plus two DALI control lines (not polarity sensitive).

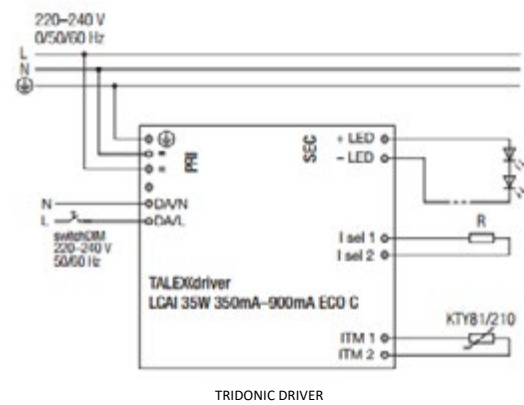

- Additional 2-Core control cable is required.
- Dedicated DALI interface or Control System is required to control this System
- Available in out-puts ranging from 350mA – 1400mA

DSI

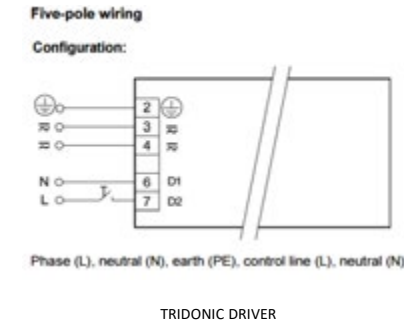

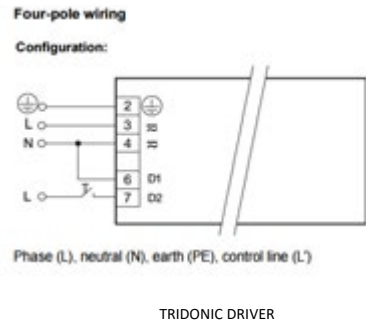

Digital Serial Interface – DSI – is a proprietary protocol of Tridonic. It was largely the precursor to the DALI system. Unlike DALI each fitting is not addressable, so each circuit must be controlled as a whole in the same manner. Again, each downlight requires standard 2C+E plus two DSI control lines (not polarity sensitive).

- Additional 2-Core control cable is required.
- Dedicated Control System is required to control this System
- Available in out-puts ranging from 350mA – 1400mA

Switch DIM

Switch DIM is a proprietary term of Tridonic’s, and essentially allows simple dimming through push button control, no low voltage cables or no digital controllers are required - Each downlight requires a standard 2C+E plus a 1 or 2 Core Switch wire, a “normally open” type push button switch is required to operate a Switch DIM system. Don’t mix different Push DIM/Switch DIM drivers on the same circuit.

- Additional 1-2 Core Switch wire is required.
- Dimming occurs through the use of a “normally open” type push button switch
- Available in out-puts ranging from 350mA – 1400mA
